Plants from Outside India

Many plants were not grown in India earlier. They have been brought from other countries. Now they are grown in different parts of our country.

Litchi has come from China.

Kinnow has come from California.

Find Out

Ask your grandparents to name two plants that they see now which were not present when they were young.

Know These Terms

Base : The lowest part of something on which it rests or stands

Survive : To continue to live or exist

Let's Recall

- Plants can be trees, shrubs, herbs, climbers or creepers depending on their size and type of stem.
- Different kinds of plants are found all over the earth depending on the climate of the place.
- Based on the climate, plants can be grouped as aquatic plants, desert plants, plants that grow on mountains, or plants that grow in hot and wet conditions.
- Plants are our green friends because they provide us with several things.
